Targeting Sebaceous Glands: "the key to a durable solution"¹

ACCURE

"In particular, the sebaceous gland plays an exquisite role in the initiation of the disease (acne) as it possesses all the enzyme machinery for the production of hormones and cytokines."³

11

"Unlike other existing laser and light options for acne treatment, however, Accure is the first light-based platform to selectively target and injure sebaceous glands, the main source of sebum production and the key to a durable solution for acne."1 Treatment with novel laser in acne studies targets sebaceous glands By Coup Brunk Dermatology News
